**THE HOTEL ENGINEERS ASSOCIATION OF NEW YORK HOLDS
SEMINAR ON ENFORCEMENT AND COMPLIANCE WITH
NEW NYC FIRE SAFETY PLAN REQUIREMENTS**

NEW YORK, NY—March 13, 2012—The Hotel Engineers Association of New York (HEANY) held a seminar to educate members of the hotel industry on the **Enforcement and Compliance with the New NYC Fire Safety Plan Requirements** on Wednesday, March 7, 2012 in New York City.

The seminar featured the insights of some of the most prominent and distinguished authorities on the subject of fire safety. Moderated by **John E. Osborn** of John E. Osborn P.C., the program boasted the expertise of **Joe Evangelista**, Captain of the Fire Department of New York and Director of the Emergency Planning and Preparedness Group of the Bureau of Fire Prevention, **Harry Falik**, Director of Security at the St. Regis New York, **Thomas Jensen**, Chief of Fire Prevention for the Fire Department of New York and **Ken Samuelson**, President and Founder of Safety Planning Group.

The program was a follow-up on a July 2011 update on the New York City Fire Code by the Hotel Engineers Association. A panel of industry leaders provided comprehensive instruction on implementing fire code revisions in a timely and economical manner, with the aim of effectively precluding future violations.

About the Hotel Engineers Association of New York (HEANY)

HEANY stands as a valuable resource and a source of detailed relevant hospitality facilities information as well as an advocate for New York City's diverse and unique array of hotels. Founded out of the need for a formal organization to provide opportunities for Hotel Engineers in the New York Metropolitan Area to meet for the purpose of mutual aid, the Association has succeeded in sustaining a forum for the exchange of information among members, with networking events and informative seminars aimed at the advancement of members' expertise and profitability. For more information on HEANY, visit www.hotelengineers.org.
